What's in your Environment? 3-5

What is an Environment?

Environment: the surroundings or conditions in which a person, animal, or plant lives.

Today we are going to use our 5 senses to explore our environment:

- Touch
- Taste
- Hearing
- Seeing
- Smell

We would like you to find a spot in your environment- preferably outside. You can take a step right out your front door or look out of your window.

What is around you?

Can you touch anything?

Can you taste anything?

Do you hear anything?

What do you see around you?

Do you smell anything?

Do you see any animals? Are they eating anything? How are humans and animals changing the environment? Does your environment change during different times of the year?

Draw your observations below and share it with us!

This program is made possible with the support from Prime Time Palm Beach County, Inc., which receives significant funding for its overall operations from the Children’s Service Council of Palm Beach County. The Palm Beach County Youth Service Department provides support for Prime Time’s Middle School Out-of-School Time Initiative.
